Primer Selection & Usage Guide

Primer Selection By Application

Porous Surface Primers
- Vulkem® Primer # 171 – Vulkem brand urethane sealants and deck coatings
- TREMprime® Silicone Porous Primer – Silicone sealants
- Tremco Primer #1 – Urethane sealants
- Deckline Primer – THC-900 and THC-901
- TREMprime Multi-Surface Urethane Primer – Urethane coatings

Non-Porous Surface Primers
- Tremco Primer #10 – Silicone sealants
- TREMprime Non-Porous Primer – Urethane sealants and coatings

Urethane Tie-Ins
- Vulkem Primer # 191 – Urethane sealants and coatings
- TREMprime Multi-Surface Urethane Primer – Urethane coatings

Hot Applied Membrane Specific Primers
- TREMprime WB
- TREMprime QD Low Odor Primer

General Application Guidelines - Detailed instructions specific to each primer are listed below.

Limitations
- Do not apply over contaminated or damp surfaces.
- Do not thin.

Packaging
Tremco Primers are available in multiple packaging options. Please contact Tremco Customer Service or your local Tremco Field Representative.

Application
All surfaces must be sound, clean, dry and free from contamination. A thorough wire brushing, grinding, sandblasting or solvent cleaning may be required to expose clean, sound, virgin surfaces. All coverage rates listed are approximate and may differ depending upon texture of the substrate finish. Any questions regarding drying times, coverage rates and unique application techniques regarding the individual primers should be directed to Tremco Technical Services or your local Tremco Field Representative.

Tremco Primer #10
Usage: Non-porous surfaces, silicone sealants
A one-component primer used to enhance adhesion of silicone sealants on non-porous surfaces such as metals and plastics. Tremco Primer #10 is also approved for Structural Glazing applications.
- Apply with a clean brush or cloth. Remove all excess primer from brush or cloth to ensure a very thin layer is applied.
- Dry time is 15 minutes at 70°F. Primer must be completely dry before applying sealant.
- Silicone sealants can be applied up to 8 hours after primer has been applied. After 8 hours, the surface must be cleaned with IPA and reprimed with Tremco Primer #10.
- Coverage Rate: 1400 -1800 sq. ft. per gallon

TREMprime WB
Usage: Porous and non-porous surfaces, TREMproof 6100, 6100BM and 6145.
High-solids, solvent-based primer for use in preparing porous and non-porous surfaces for application of TREMproof 6100, 6100BM and 6145.
- Apply with roller or airless spray equipment.
- Coverage Rate: Concrete: 150 - 300 sq.ft. per gal. Metal: 300 - 350 sq.ft. per gallon.

TREMprime Silicone Porous Primer
Usage: Porous surfaces, silicone sealants
One-component primer used to enhance adhesion of silicone sealant to porous surfaces such as concrete and limestone.
- Apply generously with a clean brush or cloth.
- Dry time is 30-45 minutes at 70°F. Primer must be completely dry before applying sealant.
- Silicone sealants can be applied up to 8 hours after primer has been applied. After 8 hours, the surface must be cleaned with IPA and reprimed with TREMprime Silicone Porous Primer.
- Coverage Rate: 500 - 600 sq. ft. per gallon 9600 lf/gal - ½” band.

Tremco Primer #1
Usage: Porous surfaces, urethane sealants
Quick-drying, one-part, moisture-curing primer used as an adhesion promoter for urethane sealants on porous surfaces such as concrete and wood.
- Apply generously with a clean brush or cloth.
- At 70°F, allow 30-45 minutes for primer to become tacky before applying sealant. Do not allow primer to dry completely. The tackiness window is approximately 2-4 hours depending on temperatures and wind speeds.
• Primed areas should be sealed the same day the primer was applied.
• Coverage Rate: 100 - 600 sq. ft. per gallon.

**TREMprime Non-Porous Primer**

Usage: Non-porous surfaces, urethane sealants coatings
A low-VOC, water-based, quick-drying, one-part primer. TREMprime Non-Porous Primer is not a film-forming primer. It is used as an adhesion promoter for urethane sealants and coatings on non-porous surfaces such as metals and plastics.
• Apply with a clean brush or roller. Remove all excess primer from brush or cloth to ensure a very thin layer is applied.
• Dry time is 15 minutes at 70°F. Primer must be completely dry before applying sealant or coating.
• Urethane sealants and coatings can be applied up to 8 hours after primer has been applied. After 8 hours, the surface must be cleaned with MEK and reprimed with TREMprime Non-Porous Primer.
• Coverage Rate: 1400 - 1800 sq. ft. per gallon.

**Vulkem Primer # 171**

Usage: Porous surfaces, Vulkem brand urethane sealants and coatings
Quick-drying, one-part, moisture-curing primer. It is used as an adhesion promoter for Vulkem brand urethane sealants and coatings on porous surfaces such as concrete and wood.
• Apply generously with a clean brush or roller. Do not apply in excess where it will puddle or pond.
• At 70°F, allow 30-45 minutes for primer to become tacky before applying sealant. Do not allow primer to dry completely. The tackiness window is approximately 2-4 hours depending on temperatures and wind speeds.
• Do not apply sealant or coating if primer becomes hard or glossy. If it does, clean with MEK and coat with Vulkem Primer No. 191.
• Coverage Rate: 100 - 600 sq. ft. per gallon.

**TREMprime Multi-Surface Urethane Primer**

Usage: Porous surfaces and interlaminary.
Urethane coatings.
Low-VOC (<60 g/L), two-part epoxy primer used to condition and prep porous surfaces and existing coatings for application of a new coating layer.
• Apply with a short nap roller or brush evenly to the surface.
• Primer must dry completely before coating application as indicated by turning from milky-white to completely clear.
• Coverage Rate: 200 - 300 sq.ft. per gallon.

**Vulkem Primer # 191**

Usage: Urethane tie-ins, urethane sealants and coatings
Quick-drying, one-part, moisture-curing primer. It is used to prepare surfaces of cured urethane sealants and coatings that will be sealed with a fresh coat.
• Apply with a clean brush or roller. Dry time is 15-45 minutes at 70°F. Apply coating or sealant within one hour after application when primer is still tacky but does not come off substrate. Primer will yellow with time if left exposed. Do not apply in excess to other substrates not intended to be coated.
• Do not apply sealant or coating if primer becomes hard or glossy. If it does, clean with MEK and coat with Vulkem Primer # 191.
• Do not apply in excess or allow to puddle. Use a short nap roller only.
• Coverage Rate: 450 - 600 sq. ft. per gallon.

**Deckline Primer**

Usage: porous surfaces, THC-900 and THC-901
Single-component, moisture-curing primer. It is used as an adhesion promoter for horizontal applications of THC-900 and THC-901 on porous surfaces such as concrete.
• Apply generously with a clean brush.
• Dry time is 1-2 hours at 70°F. Primer must be dry to the touch prior to application of the sealant.
• THC-900 and THC-901 can be applied up to 48-72 hours after primer has been applied, depending on temperature.
• Coverage Rate: 200 - 250 sq. ft. per gallon.

**TREMprime QD Low-Odor Primer**

Usage: Porous and non-porous surfaces, TREMproof 6100, 6100BM and 6145
High-solids, solvent-based primer for use in preparing porous and non-porous surfaces for application of TREMproof 6100, 6100BM and 6145.
• Coverage Rate: Concrete: 150 - 300 sq.ft. per gal.
Metal: 300 - 350 sq.ft. per gallon.

**Warranty**
